Engaging

We use a combination of Technology and non-Technology tools to improve engagement level of students, reduce dropout rates and measure their learning success

Purposeful

The technology customization ensures that the students learn what they want to learn, at the time they want to learn and with the content that develops subject expertise

Employable

We use a combination of Online, On Campus and On-the-job training tools to add a competitive advantage to the student's academic profile with a progressive rise in employability

Online Admission and Fee Management

The dedicated team of student counselors attend enquiries from prospective students and provides right guidance to the students in choosing the program that is best suited to their personal and career goals. Admission Provider also helps University use the right digital marketing tools to propagate its courses.

Admission Provider's automated admission and fee management system enables web based online payments (Payment Gateway integrated). The platform is Aadhaar integrated and has an efficient document management system associated with it. Admission Provider provides this complete platform as a managed service to the University at no extra cost. The platform also has a well-integrated MIS and a messaging system.

Online Learning Platform

Admission Provider provides a comprehensive technology infrastructure for the University to run and manage the courses and for the students to complete their learning. The integrated student portal provides individualised access to the digital classrooms. The portal enables the students get academic as well as administrative support from the University.

Every student, upon admission, is provided with a unique user ID and a password to access the online course content. On the LMS students can access the learning modules, get information about the assignments and examinations, collaborate with other students, participate in discussion forums and can track their performance. The platform is integrated with a Virtual Classroom facility where the students can attend Live sessions and can interact with the faculty.

Content Development

The content creation and academic support teams are the key strengths of Admission Provider. The team works with more than 2500 veteran faculty members spread across the world who are engaged by Admission Provider in the content creation activity. The faculty team also consists of several experienced professionals having significant industry experience.

Rich Content Library

Admission Provider's rich library of multi-modal content contains more than 10000 hours of audio-visual content, a huge question bank that can be used for self-evaluation, a repository of case studies and assignments and reading notes on several topics and programs. This library of content, available in multiple Indian languages, is developed by the Admission Provider team with the help of the faculty network using its 20 studios across the country.

Student Helpdesk and Support

Admission Provider helps Universities manage their student interactions through a dedicated contact center. The contact center, set up exclusively for the University, helps students with administrative as well as academic queries. The contact center provides telephonic support, chat support and mail support to the students during their interaction with the University. The platform has a voice recording facility to record every telephonic interaction and a ticketing system to manage support tickets. The student contact center also provides assistance to the students during their examination and readmission.

Student Information Management

Admission Provider's technology platform integrates an ERP for the life-cycle management of the student. The system handles various activities like enquiry management, student counselling, admission management, document verification, admission tests, fees management, promotions, examination management, assignments and assessments and student support management. The platform also has an integrated messaging system that sends messages using email and sms. The system also has its own payment gateway that enables online payment of fees and reconciliation. The ERP is hosted on a cluster of high-availability, high- performance and highly redundant cloud servers that provide resilience and fault-tolerance.

The recent UGC amendment addresses the Universities to implement Alumni Engagement Services. The UGC Quality Mandate Focuses on establishing an Alumni Cell that sanctions an Alumni Portal for tracking student/alumni progress, where students can stay connected with each other and the University over social media. The portal will also execute an Exit Programmed for final year students and encourage the development of alumni community for the University.

Admission Provider offers Aluminates, a social network for educational institutions to manage their alumni at No Capital Expense. This service is a part of the Company's philanthropic initiative to encourage networking and partnership opportunities among alumni. It is evident that a powerful relationship between the institution and its alumni can create a rewarding impact. We want the institutions to acknowledge the significance of alumni and generate an invaluable experience for its past and existing students.

Aluminates gives you the cost-effective solution to establish an on-going relationship with alumni and simultaneously meet the UGC quality mandate.

Our Story

Admission Provider was born in 2012 with the noble vision of revolutionizing the way Open and Distance Learning (ODL) is delivered to higher education students in India. The leadership team of Admission Provider discovered the underlying potential to improve the learning outcome for several million students who enrol into these ODL programs. Starting with a team of five members, we have grown into a team of 125+ employees, spread across 11 locations. The services of Admission Provider are used by Universities not only in servicing their ODL students but also making them employable and assisting them in getting employed.
